FORM SD

SPECIALIZED DISCLOSURE REPORT

ALTRIA GROUP, INC.

(Exact name of the registrant as specified in its charter)

Virginia

(State or other jurisdiction of
incorporation or organization)

1-08940

(Commission
File Number)

13-3260245

(IRS Employer
Identification No.)

6601 West Broad Street, Richmond, Virginia

(Address of principal executive offices)

23230

(Zip Code)

(Name and telephone number, including area code,
of the person to contact in connection with this report.): **W. Hildebrandt Surgner, Jr. (804) 274-2200**

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2018.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

A copy of Altria Group, Inc.'s ("Altria") Conflict Minerals Report is provided as Exhibit 1.01 to this Form SD and is publicly available at www.altria.com/secfilings. The information contained in, and that can be accessed through, the respective websites of Altria and its subsidiaries is not, and shall not be deemed to be, a part of this Form SD or incorporated into any other filings Altria makes with the Securities and Exchange Commission.

Item 1.02 Exhibit

A copy of Altria's Conflict Minerals Report is provided as Exhibit 1.01 to this Form SD.

Section 2 - Exhibits

Item 2.01 Exhibits

Exhibit 1.01 [Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form SD.](#)

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

ALTRIA GROUP, INC.

By: /s/ Salvatore Mancuso
Name: Salvatore Mancuso
Title: Senior Vice President, Finance and Procurement

Section 2: EX-1.01 (CONFLICT MINERALS REPORT)

EXHIBIT 1.01

ALTRIA GROUP, INC.

Conflict Minerals Report

For The Year Ended December 31, 2018

Overview:

Altria Group, Inc. is a holding company that conducts business through its wholly-owned subsidiary operating companies and services companies that support its operating companies. References to “Altria” in this report refer to Altria Group, Inc. and its subsidiary operating companies and services companies, unless otherwise specified or otherwise required. Altria prepared this report pursuant to Rule 13p-1 (the “Rule”) promulgated under the Securities Exchange Act of 1934, as amended.

The United States Securities and Exchange Commission (the “SEC”) requires registrants that manufacture or contract to manufacture products containing conflict minerals (defined as columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives, which are limited to tantalum, tin, and tungsten) necessary to the functionality or production of those products (“3TG”) to file a Form SD. For products that contain 3TG, a registrant must conduct a reasonable country of origin inquiry (“RCOI”) designed to determine whether any of the 3TG originated in the Democratic Republic of Congo or an adjoining country (a “Covered Country”). From January 1, 2018 until December 18, 2018, (the “Reporting Period”), Nu Mark LLC (“Nu Mark”), an Altria operating company, sold products containing 3TG. Altria does not believe that any of its other operating companies sold products containing 3TG that are necessary to their functionality or production. The products that Nu Mark sold that contain 3TG were e-vapor devices and related cartridges, battery assemblies and chargers under the *MarkTen* and *Green Smoke* brand names (collectively, the “Nu Mark Products”). In 2018, Nu Mark expanded its product offerings, which resulted in an increase in the number of smelters used from the previous year. However, in December 2018, Nu Mark announced the discontinuation of production and distribution of all Nu Mark Products. As of December 19, 2018, Nu Mark Products were no longer available for purchase online and were only available at existing retail locations while supplies lasted.

Description of Altria's RCOI:

Altria began investigating the uses of 3TG in its products in 2012 and has periodically updated its processes to reflect evolving industry best practices and changes to its products and supply chains. Altria established a management system to support supply chain due diligence related to 3TG that includes a senior management review board and a team of subject matter experts from functions such as Procurement, Import Export Services, Product Development and Law (the "Conflict Minerals Team"). The Conflict Minerals Team created a process for (i) conducting the RCOI regarding the use of 3TG in Altria operating companies' products and (ii) preparing the required disclosures and, to the extent necessary, reports.

Using information on the composition of Altria operating companies' products prepared by the appropriate business functions, the Conflict Minerals Team determined that certain of the Nu Mark Products contain a small amount of gold, tin, tungsten and tantalum necessary to their functionality or production.

Based on their findings, the Conflict Minerals Team performed an RCOI of the Nu Mark Products. Nu Mark had a diverse and complex global supply chain and there are typically multiple tiers between the mines and production facilities for 3TG and its direct suppliers. Nu Mark relied on its direct suppliers to coordinate with their lower-tier (upstream) suppliers to obtain accurate information about the origins of 3TG in the goods

provided to Nu Mark. Therefore, a critical part of the RCOI involved engaging with Nu Mark's direct suppliers. The Conflict Minerals Team provided Nu Mark's direct suppliers with (i) a notice letter describing the requirements of the Rule and Altria's reporting obligations and (ii) an annual certification form regarding whether the goods provided to Nu Mark contained 3TG and, if so, the source of the 3TG in those goods. The Conflict Minerals Team then worked with the direct suppliers to identify and trace the supply chain to the smelter or refiner that processed the minerals, and to the country of origin where possible, for each component of the Nu Mark Products that contained 3TG. As part of this process, the Conflict Minerals Team requested that all direct suppliers of goods that possibly contain 3TG provide information using the template developed by the Responsible Minerals Initiative ("RMI", formerly the Conflict-Free Sourcing Initiative), known as the Conflict Minerals Reporting Template (the "CMRT"). The Conflict Minerals Team also requested that the direct suppliers contact each of their upstream suppliers and request certifications regarding whether the components that they provided contained 3TG and, if so, the source of the 3TG in those components. When a report warranted clarification or confirmation, the Conflict Minerals Team contacted the direct supplier to clarify or confirm information and responses of both the direct supplier and upstream suppliers. In some cases, the Conflict Minerals Team directly contacted upstream suppliers in order to obtain CMRTs, or for clarification and confirmation of information contained in the upstream supplier's report.

The Conflict Minerals Team received responses from all the direct and upstream suppliers that were identified as part of Nu Mark's supply chain and conducted further due diligence on the source and chain of custody of the 3TG in the Nu Mark Products, as described below.

Description of Due Diligence Process:

The Conflict Minerals Team designed its 3TG due diligence process based upon the Organisation for Economic Co-operation and Development's *Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Third Edition* (the "OECD Guidelines"). This process contains the following five steps:

- Step 1. Establish Strong Company Management Systems
- Step 2. Identify and Assess Risks in the Supply Chain
- Step 3. Design and Implement a Strategy to Respond to Identified Risks
- Step 4. Carry Out Independent Third-Party Audit of Smelter/Refiner's Due Diligence Practices
- Step 5. Report Annually on Supply Chain Due Diligence

Step 1. Establish Strong Company Management Systems

Conflict Minerals Position

Altria has an internal 3TG procedure that defines the process for conducting RCOI and due diligence regarding the use of 3TG and for preparing the forms and reports required by the Rule. Altria also has a conflict minerals position statement that is available on Altria's website at <http://www.altria.com/Responsibility/Supply-Chain-Responsibility/Conflict-Minerals/Pages/default.aspx?src=leftnav>.

Conflict Minerals Team

As noted above, Altria established the Conflict Minerals Team to support supply chain due diligence related to 3TG. The Conflict Minerals Team is responsible for implementing and conducting 3TG due diligence on behalf of Altria's operating companies.

Control Systems

Altria engages in industry-wide initiatives to enhance supply chain responsibility and to keep abreast of industry best practices. Specifically, Nu Mark is a member of RMI and the Responsible Business Alliance, formerly the Electronics Industry Citizenship Coalition. The Conflict Minerals Team reviewed the

certifications and reports provided by Nu Mark's direct and upstream suppliers to confirm whether the smelters and refiners in Nu Mark's supply chain participated in RMI's Responsible Minerals Assurance Process. **Table A** below contains a list of smelters and refiners that Nu Mark's direct and upstream suppliers identified as being present in their supply chains and that the Conflict Minerals Team believed processed 3TG contained in the Nu Mark Products.

Altria has an established records retention policy with respect to documentation relevant to the use of 3TG in the Nu Mark Products.

Supplier Engagement and Contractual Requirements

As described in the summary of the RCOI above, in 2018, Nu Mark had a strong level of engagement with its direct suppliers and, when necessary, it directly engaged its upstream suppliers.

To encourage responsible 3TG sourcing, Nu Mark had agreements with its contract manufacturers requiring 3TG reporting and due diligence assistance for goods sold to Nu Mark. Nu Mark required its contract manufacturers to notify Nu Mark immediately if they determined that a Nu Mark Product or related component originated from a Covered Country. These agreements also required that contract manufacturers cooperate with the Conflict Minerals Team's 3TG reporting and due diligence efforts.

Nu Mark periodically engaged with its direct suppliers in various ways including site visits, supplier communications, and training activities. During these engagement events, Nu Mark discussed ethical sourcing topics, including the responsible sourcing of 3TG, to promote actions consistent with Altria's Mission & Values, a description of which is available on Altria's website at <http://www.altria.com/About-Altria/Our-Mission-and-Values/Pages/default.aspx>.

Grievance Mechanism

Altria has internal reporting mechanisms to receive and act on concerns expressed by employees regarding possible improper or unethical business practices or violations of company policies (including Altria's Code of Conduct), laws, or regulations. Suppliers and others may also notify Altria of potential improper or unethical business practices or violations of company policies, laws, or regulations via appropriate operating company contact information available on Altria's website at <http://www.altria.com/Pages/Contact-Us.aspx> or by accessing the Altria Integrity WebLine available at <https://altria.alertline.com/gcs/welcome>.

Step 2. Identify and Assess Risks in the Supply Chain

As described in the summary of the RCOI above, the Conflict Minerals Team engaged with Nu Mark's direct suppliers and, when necessary, its upstream suppliers to evaluate the source of 3TG in the Nu Mark Products. Upon receiving a supplier certification and report, members of the Conflict Minerals Team reviewed the information for consistency and accuracy. As noted above, when a report warranted clarification or confirmation, a member of the Conflict Minerals Team contacted the direct supplier, or in some cases the upstream supplier, to clarify or confirm the information and responses. The Conflict Minerals Team's review also included checking all identified smelters and refiners against RMI's Responsible Minerals Assurance Process database (the "Smelter Database"). With the exception of the smelters specifically noted in **Table A**, all smelters and refiners identified in Nu Mark's supply chain were listed as conformant with the relevant Responsible Minerals Assurance Process assessment protocols in the Smelter Database as of March 2019 (including their RMI smelter identification number).

Step 3. Design and Implement a Strategy to Respond to Identified Risks

The Conflict Minerals Team performs a risk assessment to identify areas of possible concern within Nu Mark's supply chain. The Conflict Minerals Team evaluates areas of possible concern and deploys appropriate risk mitigation controls and strategies. For example, one risk mitigation control is change

notification, which requires members of the supply chain to notify Nu Mark before making any sourcing changes in the supply chain.

For 2018, Altria continued to provide enhanced transparency into Nu Mark's supply chain by identifying the countries of origin for the 3TG in the Nu Mark Products. **Table B** below contains a list of countries that Nu Mark's direct and upstream suppliers identified as being the sources of 3TG contained in the Nu Mark Products.

As noted above, the Conflict Minerals Team is comprised of a multidisciplinary group of subject matter experts that periodically reports to Altria's senior management.

Step 4. Carry Out Independent Third-Party Audit of Smelter/Refiner's Due Diligence Practices

Nu Mark supported audits of 3TG smelters and refiners conducted by third parties through its participation in the RMI's Responsible Minerals Assurance Process.

Step 5. Report Annually on Supply Chain Due Diligence

This report constitutes Altria's annual report on its 3TG due diligence and is publicly available at www.altria.com/secfilings. The information contained in, and that can be accessed through, the respective websites of Altria Group, Inc. and its subsidiaries is not, and shall not be deemed to be, a part of this report or the related Form SD or incorporated into any other filings Altria Group, Inc. makes with the SEC.
